How this cheat-sheet makes you money

New publishers fail because they stare at a blank niche box.

This document gives you:

1. **50 ready niches** with best book types
 2. **Title angles** that match how Amazon buyers search
 3. **Series paths** so one niche becomes 3–5 books
 4. **Validation questions** so you don't publish random junk
 5. **Fast-start packs** for your first week inside KDP Mafia

How to read each niche row

Column	Meaning
Niche	Theme to type into KDP Mafia
Best book type	Generate this first
Alt type	Book #2 in the same niche
Audience	Who buys / gifts it
Angle	Cover + title positioning

Validation checklist (use before every niche)

Ask:

1. Can I explain the book in one sentence?
2. Would someone gift this?
3. Is the niche specific enough for a cover to make sense?
4. Am I avoiding trademarks / celebrities / brand IP?
5. Does KDP Mafia support this book type for me right now?
