Why this bonus exists

A great interior with a weak listing is an invisible book.

Amazon needs:

1. Clear title
2. Honest subtitle
3. Benefit-led description
4. 7 backend keyword slots
5. 2 solid categories

This file gives you swipeable systems for all five.

Listing rules that matter

1. You get **7 backend keyword slots** — use all 7
2. Don't waste slots repeating exact title words already covered
3. Spaces are fine; don't obsess over commas
4. No competitor brand hijacking
5. No misleading claims ("#1 bestseller", "guaranteed royalties")
6. Categories: pick the deepest accurate fit

7. Kids books: age range should match content

Don't change everything daily. Give listings time.

Title is clever but unclear	Say theme + book type plainly
Keyword slots half empty	Use packs A–I

Category is random	Use deepest accurate path
Subtitle repeats whole title	Add audience/benefit only
Using famous brand names	Remove immediately
